1. Of theſe there are twenty-four in number, *viz.* twelve on each ſide the twelve vertebræ of the back; they are ſegments of a circle; they grow flat and broad, as they approach the ſternum; but the nearer they are to the vertebræ, the rounder and thicker they are; at which end they have a round head, which, being covered with a cartilage, is received into the ſinus in the bodies of the vertebræ: the *ribs*, thus articulated, make an acute angle with the lower vertebræ: the *ribs* have each a ſmall canal or ſinus, which runs along their under ſides, in which lies a nerve, vein, and artery: their extremities, which are faſtened to the ſternum, are cartilaginous, and the cartilages make an obtuſe angle with the bony part of the *ribs*; this angle reſpects the head: the cartilages are harder

harder in women than in men, that they may better bear the weight of their breasts: the *ribs* are of two sorts; the seven upper are called true *ribs*, because their cartilaginous ends are received into the sinus of the sternum: the five lower are called false *ribs*, because they are softer and shorter, of which only the first is joined to the extremity of the sternum, the cartilaginous extremities of the rest being tied to one another, and thereby leaving a greater space for the dilatation of the stomach and intrails: the last of these short *ribs* is shorter than all the rest: it is not tied to them, but sometimes to the musculus obliquus descendens. *Quincy.*

S A B

S A C

S Has in Engliſh the ſame hiſſing ſound as in other languages, and unhappily prevails in ſo many of our words that it produces in the ear of a foreigner a continued ſibilation.

In the beginning of words it has invariably its natural and genuine ſound: in the middle it is ſometimes uttered with a ſtronger appulſe of the tongue to the palate, like *z*; as *roſe*, *roſeate*, *roſy*, *oſier*, *noſe!*, *reſident*, *buſy*, *buſineſs*. It ſometimes keeps its natural ſound; as *looſe*, *deſignation*; for which I know not whether any rules can be given.

In the end of monoſyllables it is ſometimes *s*, as in *this*; and ſometimes *z*, as in *as*, *has*; and generally where *es* ſtands in verbs for *eth*, as *gives*. It ſeems to be eſtabliſhed as a rule, that no noun ſingular ſhould end with *ſ* ſingle: therefore in words written with diphthongs, and naturally long; an *e* is nevertheleſs added at the end, as *gooſe*, *houſe*; and where the ſyllable is ſhort the *ſ* is doubled, and was once *ſſe*, as *aſs*, anciently *aſſe*; *wilderneſs*, anciently *wilderneſſe*; *diſtreſs*, anciently *diſtreſſe*.

It hath a tuberoſe root, and long nervous graſſy leaves, with a longitudinal furrow through the middle of each. There are Spring-flowering crocuſes, and thoſe which flower in Autumn. Their ſeeds are ripe about the latter end of April: the time of planting is in July. SA'LMON. *n. ſ.* [*ſalmo*, Latin; *ſaumon*, French.]

The ſalmon is accounted the king of freſh-water fiſh, and is bred in rivers relating to the ſea, yet ſo far from it as admits no tincture of brackiſhneſs. He is ſaid to breed or caſt his ſpawn in moſt rivers in the month of Auguſt: ſome ſay that then they dig a hole in a ſafe place in the gravel, and there place their eggs or ſpawn, after the melter has done his natural office, and then cover it over with gravel and ſtones, and ſo leave it to their Creator's protection; who, by a gentle heat which he infuſes into that cold element, makes it brood and beget life in the ſpawn, and to become ſamlets early in the Spring: having ſpent their appointed time, and done this natural duty in the freſh waters, they haſte to the ſea before winter, both the melter and ſpawner. Sir Francis Bacon obſerves the age of a *ſalmon* exceeds not ten years: his growth is very ſudden, ſo that after he is got into the ſea he becomes from a ſamlet, not ſo big as a gudgeon, to be a ſalmon, in as ſhort a time as a goſlin becomes a gooſe. *Walton.*

SELF. *pronoun.* plur. *ſelves.* [*ſilba*, Gothick; ſylf, ſylfa, Sax. *ſelf*, *ſelve*, Dutch.]

1. Its primary ſignification ſeems to be that of an adjective: very; particular; this above others; ſometimes, one's own.

Which you did ſhoot the firſt. *Shakeſp.*

The gate of Venus. *Dryden.*

2. It is united both to the perſonal pronouns, and to the neutral pronoun *it*, and is always added when they are uſed reciprocally, or return upon themſelves: as, *I did not hurt* him, *he hurt* himſelf; *the people hiſs* me, *but I clap* myſelf; *thou loveſt* thyſelf, *though the world ſcorns* thee.

Self is that conſcious thinking thing, which is ſenſible or conſcious of pleaſure and pain, capable of happineſs and miſery, and ſo is concerned for *itſelf*, as far as that conſciouſneſs extends. *Locke.*

3. It is ſometimes uſed emphatically in the nominative caſe: as, *myſelf* will decide it; I *myſelf* will come; *himſelf* ſhall revenge it. This uſe of *ſelf*, thus compounded, without the pronoun perſonal, is chiefly poetical.

4. Compounded with *him*, a pronoun ſubſtantive, *ſelf* is in appearance an adjective: joined to *my*, *thy*, *our*, *your*, pronoun adjectives, it ſeems a ſubſtantive. Even when compounded with *him* it is at laſt found to be a ſubſtantive, by its variation in the plural, contrary to the nature of Engliſh adjectives, as *himſelf*, *themſelves.*

5. *Myſelf*, *himſelf*, *themſelves*, and the reſt, may, contrary to the analogy of *my*, *him*, *them*, be uſed as nominatives.

6. It often adds only emphaſis and force to the pronoun with which it is compounded.

Next to the knowledge of God, this knowledge of our *ſelves* ſeems moſt worthy of our endeavour. *Hale.*

The fondneſs we have for ſelf, and the relation which other things have to our *ſelves*, furniſhes another long rank of prejudices. *Watts.*

7. It ſignifies the individual, as ſubject to his own contemplation or action.

And ſtrive your excellent *ſelf* to excel. *Spenſer.*

Since conſciouſneſs always accompanies thinking, and it is that that makes every one to be what he calls *ſelf*, and thereby diſtinguiſhes himſelf from all other thinking things; in this alone conſiſts perſonal identity, *i. e.* the ſameneſs of a rational being. *Locke.*

It is by the conſciouſneſs it has of its preſent thoughts and actions, that it is *ſelf* to it *ſelf* now, and ſo will be the ſame *ſelf*, as far as the ſame conſciouſneſs can extend to actions paſt or to come. *Locke.*

8. It is much uſed in compoſition, which it is proper to explain by a train of examples. It is to be obſerved, that its compoſition in *Shakeſpeare* is often harſh.
